STUDENT USER MANUAL
FOR BLACKBOARD
Created by Dr. Nicole A. Buzzetto-More for, and in special partnership with, the UMES Center for Instructional Technology.

June 18, 2008
Welcome!

This manual was prepared to assist students in the understanding, orientation, and usage of the Blackboard online course delivery system. If you have any questions regarding your course, please contact your instructor. If you have any technical problems please contact the UMES IT Department. They can be visited online at http://www.umes.edu/it/ or contacted via the phone by dialing x8324 on campus or 410-651-8324 off campus. The email address for the help desk is helpdesk@mail.umes.edu. Please be sure to review this manual in its entirety before going forward.

The Center for Instructional Technology (CIT) at the University of Maryland Eastern Shore assists faculty and students in e-learning. If you need assistance with the use of Blackboard 6 feel free to stop by 1106 Wilson Hall during normal business hours. An online request form is available to help us best satisfy your needs. The request form can be completed by visiting http://www.umes.edu/webct/requesthelp.cfm. The CIT can also be reached by phone at X7574.

What is Blackboard?

Blackboard is the course management system that has been adopted by the University of Maryland system. Blackboard enables the of multifaceted course websites. It is used as a course supplement or for the creation of a totally online learning experience.

Types of Courses

The majority of course websites developed will help the instructor deliver a Web-Assisted course that is fully classroom orientated with a course website used to deliver learning materials, facilitate communications, and/or provide links to resources. Other courses will follow the Hybrid Model which will blend face-to-face interaction with online learning and customarily involve the delivery of curricular materials, access to resources, submission of assignments, project based learning, learning activities that foster higher order thinking, and online communications that may be asynchronous or synchronous in nature. In order for a class to be considered hybrid some actual student learning and learning assessment must occur online and a percentage of in-class time is forfeited to make up for the weight put on the online learning activities. Using elearning to the fullest are Fully-Online learning experiences where all learning and assessment occurs online and the course does not meet in person.

Benefits of Course Websites

- Dissemination of information- Students can consult Blackboard for course information that they would normally have to retrieve from the instructor.
- Students can work at their own pace and time.
• Students can keep track of their grades and progress.

• Extending Interactions- Faculty may use the Discussion Board or Chat feature to encourage intellectual discourse, analysis, and group work. Students will be able to interact with fellow students and instructors both publicly and giving students greater access to instructors and fellow students.

• Submission of Assignments- Students can submit assignments such as papers, projects, portfolios, discussion postings, and WebPages. Grades can be checked online. It is simple for both the student and the instructor to keep track of grades. Assignments are easy to submit and students can be certain that the instructor has received the assignment.

• Assessment-Blackboard 6 supports multiple assessment regimes including portfolios (to be added), quizzes, self tests, and surveys. Students can access their grades and results regardless of time or place.

Before You Get Started

If you are working off campus or using a non-UMES computer:

Blackboard CE 6 is an environment that provides an online course management system for the development of Web, Hybrid, and Web-assisted courses. Web browsers are used as the interface for both the course designers and the course participants. Because Blackboard utilizes browsers and the World Wide Web, it is platform independent and accessible by a variety of hardware and software combinations. This feature allows you to develop and modify your course from any Web-accessible location, making these changes available to students immediately.

To access the Internet, you must have a computer and a designated Internet service provider (ISP), providing dialup (phone modem) or broadband (DSL, cable, T1/LAN services. Before access the course on Blackboard, you must determine whether or not your browser will support the system. Not all browsers are supported for use with Bb CE6; therefore, it is important that you make sure you are using a supported web browser and it is configured properly to work with Bb CE6. The following are a list of browsers that have been tested extensively and have been validated for use with Blackboard.

- Microsoft Internet Explorer 7
- Netscape 7.2
- Netscape – earlier versions
- AOL
- Mozilla
- Firefox 1.0.7 for Windows (US English)
- Firefox 1.0.7 for Mac (US English)
- Firefox 1.0. (Other versions)
- Firefox 2 for Windows (US English)
- Safari

**Disable Pop-Up Blocker**
Blackboard uses a number of small browser windows that pop-up to deliver content and in the building and delivery of courses.

**Enable Cookies**
Blackboard uses a cookie that tracks user sessions. It is important that users have cookies enabled so that they can maintain their progress as they navigate through the course website.

**Enable Javascript**
Blackboard 6 depends heavily on the use of Javascript and it is important to have Java installed and enabled in order to do almost anything in Blackboard. Some versions of Java are not validated for use with Blackboard 6.

**Browser Check**
Not all browsers are supported for use with Blackboard 6 and some browser setting may need to be further enhanced and or changed.

1. Go to your Blackboard Login Page
2. Before and after logging in, look for a Check Browser link which should be in the top right corner of the browser window.
3. Click Check Browser

**Starting With Blackboard**

**Logging in to Blackboard**
Blackboard is accessed from the UMES homepage at http://www.umes.edu click on My UMES then select the blue box that says Blackboard Learning System. Clicking on the icon takes you to the Blackboard help page. In the text boxes provided enter your UMES user name and password.
My Blackboard

After a successful login you will see the My Blackboard page. This is the main entry page for designers, instructors and students. It contains a list of all courses assigned to login as a designer, instructor and student. It also contains a variety of boxes called channels—that display information from all courses. Figure 1 illustrates a sample My Blackboard page.

The main screen displays the My Blackboard tab and the Content Manager tab that allows for viewing and editing of files saved in the private My Files area. The menu bar allows you to enter the Help or Check Browser utilities, or exit the system. The customization links allows you to customize the My Blackboard page and the channels area allow you to view the custom content added to a channel, while the Edit icon allows for the editing of the content of that channel. Click a course name to enter the course. Icons appear below the name if new announcements, assessments, assignments, discussion and mail messages since the last entry.

The Menu Bar displays my settings, check browser, help and logout. My settings allows you to set global defaults for all courses. The Check Browser runs a Blackboard utility to check the compatibility of the adopted browser. The Help opens another browser window containing comprehensive information about Blackboard CE 6. The Log out exits Blackboard for the user who logged in.

The Customization Bar displays the channels, color, layout, mail and calendar icons. The Channels allows you to customize which boxes of information appear alongside the list of courses. The color and layout allows you to customize the colors and layout of the homepage (My Blackboard page). The mail icon displays a list of each course, the
number of mail messages for that course, and the number of unread messages. The calendar icon displays a consolidated monthly calendar showing calendar entries for each day of all courses.

Once you have successfully logged in you will see all your courses that have websites listed. Click on the course that you wish to enter. From this area you can also see if you have current calendar entries, and/or recently submitted grades.

On the left hand side of your Homepage is the Tool Menu
To expand the Tool Menu select the arrows

Basic Components of a Blackboard Course
Blackboard 6 has a number of useful features. It is unlikely that your instructor(s) will use all of the features available.

Course Tools Map
Used to navigate to any section/ area of your course.

Home Page
The Home Page is starting point for your course. It clearly lays out the format and contents for your course website.

Accessing Content on the Home Page
The Home Page screen is the first screen of the Course Content tool. Depending on how the course was designed, you can access the following from the Home Page screen:
• Files which contain course material, such as course requirements, lessons, or reading lists.

• Content Links which are links to items in other course tools.

• Content Folders which are used to course content.

**Syllabus**

Under Course Tools click on the word Syllabus and choose to either open the file from its current location or download and save the file. You will be able to print out the syllabus.

**Announcements**

Your instructor may send announcements to alert students to pertinent due dates and events. Some announcements may be delivered as Pop Ups (depending on instructor preference), otherwise all announcements can be checked by clicking on Announcements in the Course Tools area.

**Calendar**

The Calendar lists dates, readings, exams, and assignments. Links may be provided to course content or external websites. It is your responsibility to check the Calendar frequently. The calendar can be viewed by week or by month. You can choose to either view a calendar with a key of all your courses or view by a singular course.
Discussion Board

Discussions can be started by students or the instructor and can be viewed by all students as well as the instructor. The Discussion Board is useful to get feedback from the instructor, or other students, on topics you have questions about. A Discussion is posted and anyone can add a comment to the board at any time. Discussions are often a required part of your course participation and with Blackboard 6 can be graded by the instructor(s).

Blackboard Discussion Area Directions

To create a new message

- From Course Tools double click on Discussion
- Choose a Discussion to enter by clicking on the title.
- Click Create Message.
- Type your message and click Post.

Read and Reply to a previously posted message.

- To read a discussion or enter a thread select the underlined subject
- To reply to a message select reply
Type your message and click post

Threading
Threading shows discussions by message heading. When messages are displayed by threads, you’ll see the subject of the thread, and then the original message on that subject. Beneath that you’ll see any replies. Replies are indented. Threading is a useful way to view discussion posting because it helps organize postings in an outline format.

To view all messages in a thread select expand all
You may also choose to create a printable view

Learning Modules
This section usually contains lecture notes, reading, or other relevant files and/or images.

- Click on the appropriate icon to open the learning module (probably titled lectures) or select from the bar on the left hand side of the screen.
- Under the heading double click on the link to select the document remember to disable your pop up blocker.
- Choose to either open from its current location or download the file to either your desktop, disk, or F drive.

Please be patient when waiting for the file to open. If it is taking an excessive length of time try refreshing the page or choosing to download the file from its current location. You should be able to print your lecture notes; however, printing can often be problematic from the view pane. As a result, it is always recommended that you download a file prior to attempting to print.

You may find that nothing happens and/or a pop up blocker appears. If this happens disable the pop up blocker by either clicking always allow pop ups from this site,
download file (if the yellow Internet Explorer pop up bar appears), or actions and check popup blocker (if you are using the Google Toolbar). This is the most frequent “problem” students have with Blackboard.

Media Library
The media library is the place where your instructor may choose to place multimedia files including but not limited to Tegrity Recordings, audio files, video files, flash files, images, and etcetera. To visit open/download an item from the media library double click on the link provided.

Web Links
The Web Links page includes links that are relevant to your course. Please take the time to visit this section and explore the links provided. To visit a URL double click on the link provided.

Assignment Section
The Assignment Section is a place where you access assignment information, submit completed assignments, and can check your assignment grades privately.

Blackboard Assignment Section Directions:
1) Open the assignment page and click on the inbox

2) Select the Assignment you would like by clicking on the title.
3) Do the assignment on your desktop and save the file in the F drive, on a disc, or on the desktop giving it an appropriate name. You may be asked to insert your submission directly into the submission box provided. If that is the case, activate the HTML creator which will assist you with formatting.

4) To submit files-click attachment then browse select the file and click upload
5) Check the file and click submit.
6) You will get a confirmation that you can print

You will be able to see your assignment if you click on the Submitted Tab and to view your grade and the instructor’s comments after the assignment has been graded click on the Graded Tab. If your instructor has used a grading form then you will need to open the grading form. It is also important to check to see whether the instructor has returned the assignment to you for additional work and resubmission, or whether they have uploaded an attachment of some form. Additionally, all grades throughout the semester can be found under My Grades.
About Direct Submit

Your instructor may be using Direct Submit to check your work for plagiarism prevention.

What Papers Are Checked Against
All submitted papers against the following databases:

- **Internet**: comprehensive index of documents available for public access on the Internet
- **ProQuest ABI/Inform** updated weekly
- **Institutional document archives** containing all papers submitted by users in their respective institutions
- **Global Reference Database** containing papers that were volunteered by students from Blackboard client institutions to help prevent cross-institutional plagiarism.

Mail

If you can send and receive email then you can use the Blackboard mail feature. Anyone with access to the class can send messages to anyone else with access to the class; however, it is very important to note that Blackboard provides an internal mailbox only. The Blackboard mail does not send messages to a persons UMES email account unless otherwise specified. The benefit of using the Blackboard mailbox is that it only contain messages that pertain to the course and are sent from participants in the course. Your instructor may choose to disable this feature; however, if it is enabled, please be sure to check your Blackboard mailbox for messages. You are also responsible for frequently checking your UMES email account. You also have the option of forwarding the mail that you receive in your Blackboard mailbox to your personal email account by going into My Options.

The Mail screen will contain four folders: Inbox, Sent Mail, Drafts, and Deleted Mail. Although the mail system is set up as an internal system, email can be forwarded to an external email account.
To Create A Message

- Click Create Message
- Click Browse for Recipients
  - Select the names of individuals in the course
  - The name(s) will appear in either the “to”, “cc”, or “bcc” fields as designated by the user
  - Enter a subject in the appropriately titled field
  - Type the message
- Click Add Attachments
  - Click this button only if you have an attachment to add
- Click Send

Chat

The chat area allows for real time discussions. An instructor may choose to schedule a chat section with or without the whiteboard feature.

To start or join a chat session.

- On the course homepage, click the ‘Chat’ icon.
- On the ‘Chat’ page, choose a room in which to start a discussion.
- In the new window, you can type messages for that everyone who is in the room will be able to view.
Type a message in the white bar on the bottom where it says enter your message and push enter on the keyboard. (this is the only way to send a typed message)

If the handraise mode has been activated you will need to raise your hand before you can participate. The handraise button is located on the right hand side of the screen.

To leave the chat room, close the screen

Who’s Online

Who’s Online displays the names of other users logged into the course and whether or not they are available to start a conversation. Instructors and students have the option of masking their online status if they wish not to make their presence known at a given time.

To Access Who’s Online
  o Select Who’s Online from the menu under Course Tools.

To Send Chat Invitation from Who’s Online
  o Select the box next to the user name
  o Click Send Chat Invitation
    ▪ (dialogue box below will appear)
  o Type your message
  o Click Send Invitation to begin the conversation
Additional Communications Tools Used in E-Learning

Blogs

Blogs are a running commentary on a particular subject or a form of journal/diary. They often combine text, images, links to other blogs, Web pages, and other media. Many are interactive enabling comments. Some types of blogs: Face book/MySpace/Friendster, ArtLogs, PhotoBlogs, VideoBlogs (vlogs), PodCast Bogs (plogs), and social bookmarking (sites like Delicious).

Wikis

Wikis are software or more commonly a Web page that gives users the ability to collaboratively create, edit, link, build, and organize the content. Think collaborative and community meaning making and Website design.

Social Bookmarking

Social Bookmarking involves collecting, organizing, storing, and sharing web links for personal expression, referencing, and etcetera which can be an individual or collaborative endeavor. When developed the collection creates new meaning for the links.

Vokis

Vokis are talking characters that individuals use to express themselves on the web using their own voice. Users can customize their Voki to look like them or take on the identity of lots of other types of characters… animals, monsters, anime etc.

Assessments

The assessment feature supports quizzes, self tests, and student surveys. Self tests are assessments for which Students receive grades and feedback, though the grades are not recorded in the Grade Book tool. Surveys are anonymous online evaluations for which no grades are assigned. Quizzes are online assessments for which grades are assigned. Quizzes can include multiple choice, matching, true false, fill in the blank, or essay based questions. All questions with the exception of essay can be graded by
Blackboard. Exams can be timed, password protected, and can have a random selecting of questions from question sets.

**Self Test**

A Self Test is created and used as a tool for students to judge what they have learned or should have learned. They are used as study tools and are not graded but provide immediate feedback. All Self Test Questions are multiple choice.

1) From the homepage double click on the self test icon

2) Read the question and click on a response

3) To read instructor feedback look to the feedback box on the upper right hand corner of the screen

**Quizzes**

Quizzes are online assessments for which grades are assigned. Quizzes can include multiple choice, matching, true false, jumbled, fill in the blank, calculated, formulaic, short answer, or essay based questions.

Please note your exam will probably be timed. It may also be close by the instructor until a designated date or time. The instructor may choose to allow all questions to be viewed at once, to allow only one question to be displayed at once, to allow students to skip and return to questions, or to allow questions to be skipped or answered but not revisited. Be certain to read the instructions provided by the instructor regarding individual quiz settings.

1) To begin click on the Assessment/Quiz icon or link.
2) Select the Assessment/ Quiz you would like to enter
3) Read the instructions
4) Disable your pop up blocker
5) Click Begin
6) After selecting the correct answer for a question be sure to click Save Answer/Next. Warning if you click the button to the right only marked. Next you will skip to the next question without answering your current question. Your instructor may or may not give you the permission to return to questions. Please pay attention to any pop up warning you may receive.

7) When you are done with the quiz select Save All and then click Finish.

8) You will receive a success message.

Using the HTML Creator
This feature may or may not be available to you. The HTML is a simple and easy to use html editor that is not unlike Microsoft FrontPage. Depending on your institution’s settings the HTML Creator may or may not be available to you.
The HTML Creator consists of the following:

- A toolbar that contains buttons for formatting content and inserting objects, such as tables, links, and images.
- An editing area where you enter content.
- Tabs that allow you to display content in either WYSIWYG (What You See Is What You Get) view or Source View.

1. **Click** Enable HTML Creator.

2. **In the HTML Creator editing area, enter your content.** Use the HTML Creator toolbar to format your text and insert objects.

![HTML Creator toolbar and editing area](image)

**Please Note:** If the HTML Creator is not working with you then you either have JAVA disabled or you are not running an updated version of JAVA.

**Groups**

The Blackboard CE Group Manager tool is new to version 6.0. It facilitates the creation, management, and assessment of group activities. Students are assigned to groups by the instructor or at random or can register via sign-up sheets. The types of group activities supported include assignment work/submission, chats, and discussions. Group members can submit work as a group or individually and students can be assessed either as a group or individually depending on instructor designation. To check group status under Course Tools go to Roster. Then select the Groups tab.
Tracking & Reporting
Instructors may be more informed than you are aware of as a result of the tracking and report tools. The Tracking tool allows instructors to run a number of reports regarding your performance and behavior that include:

- **Summary of Activity**: An overview of student activities in a course that includes the number of sessions or times a student has accessed the course, the average duration of sessions, average sessions per day, average sessions per weekday, average sessions on weekends, most active day, least active day, and most and least active hour.

- **Student Tracking**: A detailed summary of the activities of an individual student.

- **Performance Report**: Instructors are able to produce a report that documents a student’s grades for the semester. To produce the student grade report.

- **Grade Performance Report**: Instructors are able to produce a report that documents a student’s grades for the semester. To produce the student grade report.

- **Audit History Report**: The audit history produces a report that indicates all of a student’s activities with when work was assessed by the instructor.

Sample Reports:
My Tool Options

My Tools allows you to select how tools will be viewed throughout the course including discussions (threaded or unthreaded), calendar view, language, mail forwarding (enabled or disabled as well as designation choice), how and which messages are shown, number of items per page, and enable/disable who’s online. This is also where you can designate to have all of your email forwarded to either your UMES email account or another external email address.
Help

- Accesses the BlackBoard system online Help files.
  In My Home Page usually located on the upper right hand side of the screen select Help
  You can select from the topic links some of which need to be expanded by clicking on the plus sign
  Or you can type in the search box a word of phrase
• Searching for Keywords in Help Topics
  o Click Help.
  o In the Search text box, enter the keywords. If you are searching for keywords, you can also use basic Boolean operators
    ▪ You can combine operators and designate the order of search operations by using parentheses ( ).
    ▪ To search for exact phrases, use quotation marks (" ").
  o Click the Submit Search icon. Search results appear in order of relevance.
  o Click the help topic that you want to view.
  o To return to the search results, click the Back icon.

The help tool is quite useful and should be used as a quick and easy reference; however, it does not contain the illustrations or the details included within this text.

An Additional note about receiving help.
Mr. Kaye Pinhey with the Center for Instructional Technology serves as the University of Maryland Eastern Shore Blackboard administrator. His office is in 1106 Wilson Hall and he is available during normal business hours. Mr. Pinhey can be reached directly at kdpinhey@umes.edu (preferred) or at x7574. If you find that you are having technical problems not related to the use of Blackboard then you should contact the UMES Department of Information Technology which is located in Waters Hall. You will also find their staff to be accommodating.

Content Manager
You have two tabs in the My Home Page area: My Blackboard and Content Manager. All of the activities we have discussed thus far have taken place in the My Blackboard area. The Content Manager tool is extremely useful for file and folder management.

From here you can
• Get Files.
• Copy Files and Folders.
• Move Files and Folders.
• Create HTML Files.
• Edit HTML Files.
• Create Folders.
• Rename Files and Folders.
• Edit File Properties.
• Download Files.
• Zip/Unzip Files And Folders.
• Delete Files and Folders.
• Navigate Folders.
UMES EMAIL Information

When taking a class online it is important that students maintain contact with instructors. The most expedient means of communication is email and it is expected that all students use their UMES email account. All students, faculty, and staff of UMES are provided with an email account available at no charge. It is required that all students enrolled at UMES maintain a UMES email account and check the account on a regular basis.

Requesting A UMES Email Account

Email accounts are available by completing a form available through the UMES Office of Information Technology located in Waters Hall. The Office of Information Technology has information/ directions on using the UMES Network, Hawk Web, Remote Log In, and Telecommunications Systems. The IT help desk can be contacted via phone at x8324 on campus and 410-651-8324 off campus or through email at helpdesk@mail.umes.edu
